

# Product Protection

Innovative Solutions Provider

Caps | Plugs | Netting | Containers | Tubing | Shercon Masking

## GLOBAL EXPERT

As a market leader with over 60 years of experience in product protection, Caplugs develops the most innovative, cost-efficient solutions across many industries. With six manufacturing facilities and sales representatives around the world, we have the regional presence you require and the support you can count on.

We provide the protection solution you're looking for. From either one of our 15,000+ standard parts that are always in stock and ready to ship, or by working with you to design a custom part that meets your exact specifications.

Over **400,000,000** parts in stock.  
Over **10,000,000** parts produced per day.  
Over **15,000** standard parts.  
Over **200** molding machines.  
Over **15** engineers.  
**6** manufacturing facilities.  
The **1** partner you need.

*Expertise in serving multi-national customers for 60+ years*

## MANUFACTURING POWERHOUSE

### Molding Processes

We employ the latest in molding technologies to produce a vast array of parts that perform in a wide range of protective applications.

### In-House Engineering

A team of in-house design engineers will consult one-on-one with you to determine the best solution that meets all your requirements.

### Quality Management Systems

We implement the strictest quality management processes to ensure consistent, quality products.

### Technical Support

Experienced teams of technical sales and customer service representatives are available to help you every step of the way.

Injection Molding

Dip Molding

Extrusion

Vinyl Coating

Die-Cutting

# RUBBER MOLDED COMPONENTS

With a **broad range** of rubber molding capabilities and a full staff of experienced **engineering experts**, Caplugs can meet your **exacting requirements** from part design to tooling to full volume production.

## Engineered To Your Specifications

Our knowledgeable engineers will work with you one-on-one to design a component fit for your specific applications and determine the best process to meet your needs. Our in-house rubber molding capabilities include:

Compression Molding

Transfer Molding

Injection Molding

In addition to a close collaboration with engineers, innovative design software is utilized to create an efficient and effective solution using 3D models. With over 70 presses between 100 and 500 tons and one 1,200 ton press, we have the advanced resources to deliver projects quickly, accurately and economically.

## Custom Molded Masks

Caplugs can help you solve your masking challenge – no matter how big or small. Your dedicated project team will work with you from design and production to fulfillment – quickly and cost-effectively.

### Paintball gun mask

Material: EPDM  
Finishing process: Powder coating  
Quantity: 2,500

### Air valve mask

Material: Ultrabake™  
Finishing process: Anodizing  
Quantity: 650

### Sprocket pulley mask

Material: Ultrabake™  
Finishing process: Chrome plating  
Quantity: 300

### 10-stud axle mask

Material: EPDM  
Finishing process: Wet paint  
Quantity: 5,000

## Compound Mixing

- Ingredients are weighed and mixed in Banbury-style tilt mixers
- Compounds are rested
- Curing agents are added
- We perform MDR, SG, hardness, tensile and elongation tests on every batch
- Additional tests are performed based on customer need and our internal control plan; heat aging, compression set, ozone resistance, low temperature brittleness, staining, etc.
- Caplugs can mix the right compound for your unique application

## Masking Solutions Made Easy

With our multiple production processes, we can provide a solution that best meets your needs. Caplugs boasts the largest inventory available, with over **15,000** standard parts and **6,000** different, masking-specific parts in stock and ready to ship.

- Most standard parts in stock and ready to ship
- Broadest range of product styles and sizes
- Most extensive in-house custom capabilities
- Stringent quality management system to ensure the highest quality
- Proven supplier across all industries and applications
- THE industry expert

## Caplugs Comprehensive Custom Die-Cutting Capabilities Include:

- Prototypes in 24 hours
- Custom die-cut designs from a simple sketch or drawing
- We can hold tolerances of  $\pm 0.002''$  on a 24" length

Create your perfect solution with our custom die-cutting capabilities

- Masks supplied in rolls, sheets or pre-assembled kits
- Capacity for full in-house custom converting
- Custom die-cut samples provided upon drawing approval

## Custom Engineered Solutions

If one of our standard parts does not meet your exact needs, allow our team of in-house engineers to design a custom part for you. We will take you through every step of the process, from design and prototyping to tooling and production.

### In-House Engineers

Caplugs has the largest and most experienced engineering staff in product protection.

With our unique expertise, the latest equipment and technology, an in-house tool room and a **wide array of material options**, your solution can be produced **quickly and economically**.

## Products & Capabilities

Caplugs produces over 10 million caps, plugs, tapes, die-cuts, hooks and racks per day. And our advanced production capabilities deliver the most efficient, consistent and timely solutions to our customers.

### Injection Molding

- 9 to 700 ton presses
- Quick-change procedures
- Interchangeable molding system

### Vinyl Dip-Molding

- Variety of shapes, sizes and colors
- Inexpensive tooling with quick turnaround

### Vinyl Coating

- Bond protective and attractive vinyl coating to any metal piece
- Ideal for ergonomic applications

### Compression Molding

- 100 to 1,200 ton presses
- Prototypes in 15 days
- Capable of rubber-to-metal bonding

### Extrusion

- Tubing, netting, edge liners and other profiles
- Cut to desired length in-line or run in spools

### Part Modification

We can also alter existing parts through secondary operation processes including pad printing, slicing, cutting or hole punching

# CUSTOM ENGINEERING SUPPORT

Let our design engineers collaborate with you to develop a custom solution from a full range of in-house capabilities – we take you through design and prototyping to tooling and production. Whether it's a large diameter part or a small, precision piece – we'll create exactly what you need from a wide array of material options.

## In-House Custom Process:

- Concept and Design
- Rapid Prototyping
- In-House Tool Fabrication
- Full Production Capability
- Component Approval Process
- Special Packaging
- Inventory Management

“Need a unique shape? Size? Color? Material? Process requirements? We can help.”
